Findings on the checked page (2 issues, 5 to check, 4 checks passed)

Image alt text

ISSUE FOUND

Measured: 22 of 29 images without usable alt text (75.9%): 0 without attribute, 22 empty

More than one in ten images carries no alt text. Every missing alt text is a lost image-search entry and an accessibility defect (WCAG 2.1 / ADA exposure for US clients). Screen readers announce nothing, so visually impaired visitors - and crawlers - see gaps.

Recommended fix: Add descriptive alt text to every content image; decorative images get alt="".

Page size (HTML)

ISSUE FOUND

Measured: 557.7 KB of HTML (threshold 400 KB) with 0 scripts, 4 stylesheets and 29 images referenced

A heavy HTML document delays the first paint, most of all on the mobile connections used by people searching for an emergency repair. Slow pages lose visitors before the phone number is visible, and Core Web Vitals are a ranking factor.

Recommended fix: Split oversized inline CSS/JS into cached files, drop unused page-builder code, compress and lazy-load images.

Accessibility (WCAG 2.1 AA): Elements must meet minimum color contrast ratio thresholds

ISSUE FOUND

Measured: 1 Stelle(n), Auswirkung: serious

axe-core meldet diesen Verstoß (Auswirkung serious) auf a[href\$="email-protection"].

Barrierefreiheit ist in den USA (ADA/Section 508) und in der EU (EAA/EN 301 549) einklagbar;

Screenreader-Nutzer und Google-Bots bewerten die Seite danach mit.

Recommended fix: Element(e) a[href\$="email-protection"] gemäß <https://dequeuniversity.com/rules/axe/4.12/color-contrast?application=axeAPI> korrigieren.

Accessibility (WCAG 2.1 AA): Document should have one main landmark

How this audit was made

The page was loaded once as a normal browser request and analysed in its delivered state (no CMS login, no JavaScript executed unless the request had to fall back to a rendering service). All values above come from that single response; they are reproducible. Assessment date: 2026-09-25. Page-size numbers cover the HTML document only, external assets excluded.

Next steps

- Fixes are implemented page-by-page; the highest-impact items (Image alt text, Page size (HTML)) go first.
- After the fix we re-run this exact measurement set and hand over the before/after numbers.
- Structured data and meta descriptions are also submitted to Google Search Console so the rich results actually appear.
