Findings on the checked page (1 issue, 5 to check, 5 checks passed)

Image alt text

ISSUE FOUND

Measured: 4 of 11 images without usable alt text (36.4%): 3 without attribute, 1 empty

More than one in ten images carries no alt text. Every missing alt text is a lost image-search entry and an accessibility defect (WCAG 2.1 / ADA exposure for US clients). Screen readers announce nothing, so visually impaired visitors - and crawlers - see gaps.

Recommended fix: Add descriptive alt text to every content image; decorative images get alt="".

Footer / copyright year

CHECK

Measured: latest year in HTML: 2024

An outdated year signals to visitors that the site - and possibly the business - is not maintained.

Recommended fix: Update the footer year.

How this audit was made

The page was loaded once as a normal browser request and analysed in its delivered state (no CMS login, no JavaScript executed unless the request had to fall back to a rendering service). All values above come from that single response; they are reproducible. Assessment date: 2026-09-25. Page-size numbers cover the HTML document only, external assets excluded.

Next steps

- Fixes are implemented page-by-page; the highest-impact items (Image alt text) go first.
- After the fix we re-run this exact measurement set and hand over the before/after numbers.
- Structured data and meta descriptions are also submitted to Google Search Console so the rich results actually appear.
- Questions or the raw measurement file: hello@apex-data.io
