Findings on the checked page (2 issues, 8 to check, 4 checks passed)

HTTPS / SSL

ISSUE FOUND

Measured: Scheme used: https | certificate valid: False | plain HTTP port 80 reachable: True | [SSL: CERTIFICATE_VERIFY_FAILED] certificate verify failed: Hostname mismatch, certificate is not valid for 'monarch-roo

Without a valid certificate Chrome and Safari label the page "Not secure" before the visitor reads a single line. Homeowners drop out of forms at that point, and Google ranks HTTPS pages above plain-HTTP competitors.

Recommended fix: Install a valid certificate (Let's Encrypt is free), force HTTPS via 301 redirect and fix mixed-content assets.

Image alt text

ISSUE FOUND

Measured: 11 of 32 images without usable alt text (34.4%): 8 without attribute, 3 empty

More than one in ten images carries no alt text. Every missing alt text is a lost image-search entry and an accessibility defect (WCAG 2.1 / ADA exposure for US clients). Screen readers announce nothing, so visually impaired visitors - and crawlers - see gaps.

Recommended fix: Add descriptive alt text to every content image; decorative images get alt="".

Accessibility (WCAG 2.1 AA): Elements must meet minimum color contrast ratio thresholds

ISSUE FOUND

Measured: 31 Stelle(n), Auswirkung: serious

Barrierefreiheit ist in den USA (ADA/Section 508) und in der EU (EAA/EN 301 549) einklagbar; Screenreader-Nutzer und Google-Bots bewerten die Seite danach mit.

Recommended fix: Element(e) .hidden-sm.active > a[href="/"], #sm-1790315944824621-1, li:nth-child(3) > a[title="Roof Repair"][href\$="roof-repair"] gemaess https://dequeuniversity.com/rules/axe/4.12/color-contrast?application=axeAPI korrigieren.

How this audit was made

The page was loaded once as a normal browser request and analysed in its delivered state (no CMS login, no JavaScript executed unless the request had to fall back to a rendering service). All values above come from that single response; they are reproducible. Assessment date: 2026-09-25. Page-size numbers cover the HTML document only, external assets excluded.

Next steps

- Fixes are implemented page-by-page; the highest-impact items (HTTPS / SSL, Image alt text) go first.
- After the fix we re-run this exact measurement set and hand over the before/after numbers.
- Structured data and meta descriptions are also submitted to Google Search Console so the rich results actually appear.
