Findings on the checked page (1 issue, 4 to check, 5 checks passed)

Image alt text

ISSUE FOUND

Measured: 4 of 4 images without usable alt text (100.0%): 4 without attribute, 0 empty

More than one in ten images carries no alt text. Every missing alt text is a lost image-search entry and an accessibility defect (WCAG 2.1 / ADA exposure for US clients). Screen readers announce nothing, so visually impaired visitors - and crawlers - see gaps.

Recommended fix: Add descriptive alt text to every content image; decorative images get alt="".

Click-to-call phone link

CHECK

Measured: tel: links found: none

A tel: link lets a phone visitor start the call with one tap instead of copying a number.

Recommended fix: Wrap the header phone number in a tel: link.

Accessibility (WCAG 2.1 AA): <html> element must have a lang attribute

How this audit was made

The page was loaded once as a normal browser request and analysed in its delivered state (no CMS login, no JavaScript executed unless the request had to fall back to a rendering service). All values above come from

that single response; they are reproducible. Assessment date: 2026-09-25. Page-size numbers cover the HTML document only, external assets excluded.

Next steps

- Fixes are implemented page-by-page; the highest-impact items (Image alt text) go first.
- After the fix we re-run this exact measurement set and hand over the before/after numbers.
- Structured data and meta descriptions are also submitted to Google Search Console so the rich results actually appear.
- Questions or the raw measurement file: hello@apex-data.io
