Findings on the checked page (4 issues, 1 to check, 2 checks passed)

Meta description

ISSUE FOUND

Measured: No <meta name="description"> tag found

Google writes the snippet itself from random page text. Competitors with a crafted description get a more convincing result and more clicks from the same ranking.

Recommended fix: Write a 120-160 character description per key page naming service + city.

Schema.org structured data

ISSUE FOUND

Measured: No JSON-LD block, no microdata itemtype found

Rich results (star rating, service area, FAQ, opening hours) are only granted when the page carries structured data. Without it the listing stays a plain blue link while competitors show ratings - the same search position, visibly fewer calls.

Recommended fix: Add LocalBusiness/RoofingContractor JSON-LD (name, address, phone, area served, opening hours) plus Service and Review markup.

H1 heading

ISSUE FOUND

Measured: 2 H1 tag(s) found - "Roofing" | "Company"

The H1 is the strongest on-page signal for "what is this page about". No H1 means the page competes for the main keyword without ever stating it; several H1s dilute the topic.

Recommended fix: Set exactly one H1 per page containing the core service and city.

Image alt text

ISSUE FOUND

Measured: 7 of 12 images without usable alt text (58.3%): 0 without attribute, 7 empty

More than one in ten images carries no alt text. Every missing alt text is a lost image-search entry and an accessibility defect (WCAG 2.1 / ADA exposure for US clients). Screen readers announce nothing, so visually impaired visitors - and crawlers - see gaps.

Recommended fix: Add descriptive alt text to every content image; decorative images get alt="".

Footer / copyright year

CHECK

Measured: latest year in HTML: 2021

An outdated year signals to visitors that the site - and possibly the business - is not maintained.

Recommended fix: Update the footer year.

Checks that passed

- HTTPS / SSL - Served over HTTPS, certificate valid (expires Dec 21 13:46:11 2026 GMT)
- Page size (HTML) - 110.5 KB HTML

Measured values

URL checked	https://mysunliferoofing.com/
HTTP status	200 (Apache)
Fetch method	urllib-direct
Server response	928 ms
Page title	Sunlife Roofing Florida's premier roofing company (56 chars)
HTTPS / certificate	https, certificate valid, expires Dec 21 13:46:11 2026 GMT
Meta description	MISSING
Schema.org	MISSING
H1 tags	2
Images / without alt	12 / 7
HTML size	110.5 KB (113109 bytes)

How this audit was made

The page was loaded once as a normal browser request and analysed in its delivered state (no CMS login, no JavaScript executed unless the request had to fall back to a rendering service). All values above come from that single response; they are reproducible. Assessment date: 2026-09-23. Page-size numbers cover the HTML document only, external assets excluded.

Next steps

- Fixes are implemented page-by-page; the highest-impact items (Meta description, Schema.org structured data, H1 heading) go first.
- After the fix we re-run this exact measurement set and hand over the before/after numbers.
- Structured data and meta descriptions are also submitted to Google Search Console so the rich results actually appear.
- Questions or the raw measurement file: hello@apex-data.io
