Findings on the checked page (3 issues, 5 to check, 3 checks passed)

H1 heading

ISSUE FOUND

Measured: 2 H1 tag(s) found - "Licensed & Experienced Roofing Contractors" | "Licensed & Experienced Roofing Contractors"

The H1 is the strongest on-page signal for "what is this page about". No H1 means the page competes for the main keyword without ever stating it; several H1s dilute the topic.

Recommended fix: Set exactly one H1 per page containing the core service and city.

Image alt text

ISSUE FOUND

Measured: 18 of 89 images without usable alt text (20.2%): 18 without attribute, 0 empty

More than one in ten images carries no alt text. Every missing alt text is a lost image-search entry and an accessibility defect (WCAG 2.1 / ADA exposure for US clients). Screen readers announce nothing, so visually impaired visitors - and crawlers - see gaps.

Recommended fix: Add descriptive alt text to every content image; decorative images get alt="".

Page size (HTML)

ISSUE FOUND

Measured: 1046.1 KB of HTML (threshold 400 KB) with 44 scripts, 0 stylesheets and 89 images referenced

A heavy HTML document delays the first paint, most of all on the mobile connections used by people searching for an emergency repair. Slow pages lose visitors before the phone number is visible, and Core Web Vitals are a ranking factor.

Recommended fix: Split oversized inline CSS/JS into cached files, drop unused page-builder code, compress and lazy-load images.

Accessibility (WCAG 2.1 AA): Heading levels should only increase by one

CHECK

Measured: 4 Stelle(n), Auswirkung: moderate

axe-core meldet diesen Verstoß (Auswirkung moderate) auf .et_pb_text_2 > .et_pb_text_inner > h4, .et_pb_text_6 > .et_pb_text_inner > h4, .et_pb_text_10 > .et_pb_text_inner > h4.

Barrierefreiheit ist in den USA (ADA/Section 508) und in der EU (EAA/EN 301 549) einklagbar; Screenreader-Nutzer und Google-Bots bewerten die Seite danach mit.

Recommended fix: Element(e) .et_pb_text_2 > .et_pb_text_inner > h4, .et_pb_text_6 > .et_pb_text_inner > h4, .et_pb_text_10 > .et_pb_text_inner > h4 gemaess <https://dequeuniversity.com/rules/axe/4.12/heading-order?application=axeAPI> korrigieren.

How this audit was made

The page was loaded once as a normal browser request and analysed in its delivered state (no CMS login, no JavaScript executed unless the request had to fall back to a rendering service). All values above come from that single response; they are reproducible. Assessment date: 2026-09-21. Page-size numbers cover the HTML document only, external assets excluded.

Next steps

- Fixes are implemented page-by-page; the highest-impact items (H1 heading, Image alt text, Page size (HTML)) go first.
- After the fix we re-run this exact measurement set and hand over the before/after numbers.
- Structured data and meta descriptions are also submitted to Google Search Console so the rich results actually appear.
- Questions or the raw measurement file: hello@apex-data.io
